

Instructor: Summer Programs at Cary Academy

Creativity is contagious when you get a taste of what the older campers do at summer camp. Experience the smells coming from the kitchen, perform a concert made of handmade instruments, finger-paint the next Van Gogh, and watch what happens when food color is mixed with bubbles. Combine all those experiences for a fun and adventurous week. Let your interest and personality shine through and give back to the community through simple acts of service. We will have daily adventures and visits from guest instructors. At the end of the week all you can say is, "WOAH!"

Jr. Architects with a Grandparent or Special Friend

NEW!

Instructor: Cary School of Creative Arts

Picture great cities of the world and their monumental and iconic architecture comes to mind. Campers and their grandparents or special friends will team up to create their own architectural firm in order to build things in 3D: a hockey rink, football stadium, golf course, art gallery, museum, roller coaster theme park, aquarium or whatever else you can fathom! Our grandparents and special friends will be able to add their worldly experience and expertise to help design these new architectural wonders, and add their own special details to the finished pieces. As future architects, learn about perspective drawing and go outdoors to draw the architecture of Cary Academy. For the final project our creative engineering skills will be challenged with the classic "egg drop" project where teams design a device to protect an egg from a 15 foot drop as campers from other summer programs watch the competition and cheer us on!

CULINARY & CULTURAL ARTS

Cooking Lab

NEW!

Instructor: Diane Rokuskie

Why do muffins rise? What makes popcorn pop? Find out the answers to these and more questions during a super fun week that is one part cooking camp and one part science camp. Each day will find us focusing on a new recipe and the science that makes it possible. First, we will experiment in our kitchen lab, then we will put our findings to the ultimate test: a taste test. Join us as we discover why, without science, the kitchen would be a boring and not so tasty place to be.
